

Alan G. Goedde is a member of the firm of Freeman & Mills, a consulting firm offering services in the areas of accounting, finance, economics and business practices and procedures. He has over 20 years of experience developing financial and economic analyses to solve business problems. Dr. Goedde was formerly a vice president of Putnam, Hayes & Bartlett, Inc., an economic and management consulting firm. Before joining Putnam, Hayes & Bartlett and its predecessor firm, Freeman & Mills, Incorporated, Dr. Goedde had extensive business and regulatory experience while in industry and government. He was president of a technology marketing and licensing company, head of strategic planning for the NutraSweet Company and vice president-strategic planning for a division of First National Bank of Chicago. While at the U.S. Treasury, his responsibilities included corporate fraud, technology licensing, business valuation and transfer pricing. He has testified in U.S. Tax Court.

A considerable part of Dr. Goedde's practice involves intellectual property issues including patent, trademark, copyright, trade secret and unfair competition matters as well as business valuations. His background in engineering and economics combined with his work experience in profit planning, budgeting, product marketing and acquisitions analysis has enabled him to assist clients in a wide range of intellectual property litigation. Dr. Goedde can also draw upon his experience as a patent examiner at the U.S. Patent and Trademark Office.

His testimony experience in patent infringement matters includes economic analysis of the *Panduit* factors, applying *Georgia Pacific* factors to evaluate reasonable royalty; and, developing RAND royalty rates considering such issues as scope of the royalty base, lump sum and running royalties, royalty stacking, license comparability, university licensing agreements, exclusive licensing, and apportionment of profits to non-infringing components.

Dr. Goedde has consulted and testified on numerous high technology matters including semiconductors, wired and wireless media, internet media delivery systems, cell phone component manufacture, telecommunications, software and biotechnology. His analysis and testimony have involved accelerated product life cycles, first-mover advantages, economics of startup and development stage companies, market power, product development costs, and distribution economics.

In copyright, trademark and trade secret matters, Dr. Goedde has testified to lost profits, unjust enrichment, causal connections between the plaintiff's loss and the defendant actions, apportionment of direct and indirect profits, price erosion, incremental costs and spoiling the market.

In the entertainment industry, Dr. Goedde has testified and consulted on numerous copyright and trademark matters as well as such issues as rights of publicity, motion picture rights, visual artist rights, credit/idea misappropriation, celebrity endorsement value, and the value of motion picture and photography libraries.

ALAN G. GOEDDE

Dr. Goedde has testified on issues involving employment compensation, employment agreements, performance benchmarks, and wrongful discharge in a variety of industries. In franchising matters, his experience includes franchise growth, business viability, and trademark value. His industry expertise includes manufacturing, pharmaceuticals, biotechnology, industrial products, foods, automotive aftermarket, airlines, electronics and software.

In antitrust matters, Dr. Goedde has provided analysis and expert testimony on the definition of relevant markets, the competitive impact of mergers, market power, price discrimination, predatory pricing, as well as the presence and extent of price fixing. He has testified in a number of patent/antitrust matters involving inequitable conduct including Walker Process fraud. In addition to providing testimony in federal and state courts, Dr. Goedde has also appeared before the Federal Trade Commission and the United States Court of International Trade.

Dr. Goedde has testified on financial and economic matters involving Superfund and hazardous waste sites including stigma damages. He has also testified to the use of statistical methods, sampling and economic analysis in developing damage claims and in identifying markets. His experience also includes analyses in securities pricing, bankruptcy, business interruption, dealer termination, and valuation of minority holdings.

Dr. Goedde has served as an arbitrator for the American Arbitration Association.
